

## CSA – Frequently Asked Questions

---

### Line of Credit

#### **If my line of credit runs out, can I add more money during the season?**

Of course! You may add any amount of credit at anytime once the season has begun, however you will not receive any bonus credit as you did for the initial payment for the membership.

### Farmer's choice

#### **What does a typical Farmer's choice box contain?**

Please see the end of this document to view the contents of last year's boxes week by week.

#### **How do the contents of the full share and half share boxes differ?**

The full share and half share boxes will generally contain the same types of vegetables, with the full share receiving a larger quantity of them. In addition, the full share will usually have at least one extra type of vegetable in their box.

#### **How much credit should I expect to complete the value my box?**

Each week, half share members should expect \$4-5 and full shares \$6-7

## When I pick my box up, do I have to complete the remaining value of the box that day?

No! We happily let our members roll their credit over to the next week if they would rather wait to spend it on something else as the season progresses. For example some members may want to save their credit up prior to October to spend it on pumpkins and other fall decorations – this is completely okay! However, we encourage our members to use their credit before the end of the season because it will **NOT rollover** to the next year and it is **NOT refundable**.

## If something comes up, can I change my pickup day?

Yes, changing your pickup day temporarily is not a problem as long as we are notified at least one day in advance. If you need to permanently change your pickup day from one day to the other it is also not an issue. By knowing the number of boxes needed to be made up for a pickup day, we will not end up picking too much (potentially wasting food) or too little for that day.
